Make a
sweep net

It's the perfect bug-catcher in long grass.
What will you catch today?

1 Bend the coat hanger into a diamond shape.
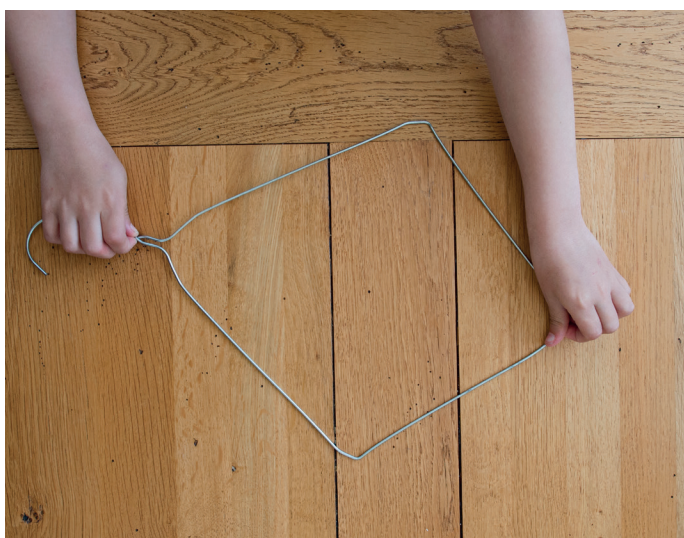

2 Attach the top of your bag/pillow case to the diamond with parcel tape.

3 Use the hook of the coat hanger as a handle. Wrap parcel tape around any sharp bits.

Sweep in style

The best way to use your net is to sweep very gently through long grass. Bugs drop into the net, rather than being bashed out of the way.
