

# Make potato traps

Who's been eating my spud? Put out baked potatoes and then find out what's been eating into them.

## You will need

- Baked potatoes
- Knife
- Cocktail sticks or tweezers

- 1** Cut the baked potatoes in half lengthways.

- 2** Lay them cut side down on damp soil in an out of the way spot.

- 3** Pick them up at least 24 hours later. Don't look at them before that!

- 4** If anything has been eating into your potato halves, use cocktail sticks or tweezers to see if you can find it (don't hurt them though!). Let them go where you found them afterwards.
